VirtualValv Support™

On-demand, Augmented Reality Remote Assistance and Support for all your Trouble-shooting and Service Needs

VALVTECHNOLOGIES®

VirtualValv Support™

ValvTechnologies' VirtualValv Support™ delivers a wide range of remote support to customer site personnel during the normal plant operation including valve repair and installation, immediate troubleshooting, assistance performing site tests and inspections and any other planned or unplanned maintenance event.

Conducted by a ValvTechnologies' certified technician, ValvTechnologies can also provide a dedicated augmented reality remote assistance technician to provide continual support to optimize production and facilitate direct access to our full breadth of service support.

VirtualValv Support™ Benefits:

- 24/7 site support from anywhere in the world
- Remote-assistance and testing
- Flexibility of scheduling
- Eliminates time and expense of traveling onsite
- Intrinsically-safe
- Light-weight
- Works on WIFI, cell phone hotspot, or 4G
- Easy-to-use (training completed in 30 minutes or less)
- Service work can be recorded
- Operates on Microsoft Teams
- Work procedures in local language

VirtualValv Support™

VirtualValv Support™ benefits the energy industry by allowing users to connect to expert operators in various specialized fields in real time to enhance the safety and efficiency of on-site jobs in factories, refineries, oil and gas platforms or education settings.

Minimized downtime by letting your field operator video call the engineering expert. That expert sees through the operator's eyes and helps troubleshoot the problem without having to go on location.
